Hiring Manager

Harman International

Talent Acquisition - Engineering & AI/ML

Dear Hiring Manager,

I am Bharath C, a final-year B.E. student in Electronics and Communication Engineering (2022–2026), and I am eager to apply for the AI/ML Intern position at Harman International. Harman's focus on intelligent, connected technology strongly aligns with my academic background and passion for building real-world machine learning and NLP systems.

I have strong hands-on experience with Python and Java, and I am well-versed in core machine learning concepts including supervised learning, unsupervised learning, regression, classification, KNN, and K-Means clustering. I regularly work with data preprocessing and visualization libraries such as Pandas, NumPy, and Matplotlib, and I have applied Scikit-learn across multiple end-to-end ML projects. My NLP experience covers tokenization, stopword removal, TF-IDF vectorization, and sentiment analysis, while my computer vision skills include OpenCV and OCR using Pytesseract.

In my project AI-Based Smart Prediction and NLP Analysis System, I designed and trained ML models including Linear Regression, Logistic Regression, and KNN, and built a full NLP pipeline for text classification, evaluating performance using accuracy, precision, recall, and R-squared metrics. In a second project, AI-Based Text Recognition and Audio System, I built a real-time end-to-end pipeline using OpenCV, OCR, and Text-to-Speech — demonstrating my ability to work across computer vision and applied AI. I also hold a certification in Generative AI (Outskill, 2026) and AWS Cloud Practitioner Essentials, which reflects my eagerness to learn emerging technologies.

I am excited about the opportunity to contribute to Harman's engineering teams and grow in an environment known for innovation at scale. I am a quick learner with a strong problem-solving mindset, and I am confident I can add value from day one. I would welcome the chance to discuss how my skills align with your team's goals..

Yours Sincerely,
Bharath C
