## SUMMARY

Aspiring Full Stack Developer currently pursuing Electronics and Communication Engineering. Built an AI-powered LLM-Based Q&A System using Retrieval-Augmented Generation (RAG) to deliver context-aware responses from user-uploaded documents. Skilled in React.js, Node.js, REST APIs, and database management, with hands-on experience in integrating AI models, vector databases, and real-time applications.

## PROJECTS

### LLM-Based Q&A System

- Designed and implemented a **Retrieval-Augmented Generation (RAG)** pipeline using Python (**FastAPI**), **OpenAI API**, and **ChromaDB** to generate accurate, context-aware answers from user-uploaded documents
- Developed a scalable REST API using **FastAPI**, handling document ingestion, text extraction, embeddings generation, and query processing
- Integrated vector database **ChromaDB** with embedding models (**HuggingFace**) for efficient semantic search and similarity matching
- Built an interactive chat-based UI using **React.js (with Tailwind CSS)** enabling real-time response streaming and seamless user interaction

### Spotify Playlist Helper

- Developed a full-stack web application integrating Spotify Web API to analyze user playlists and generate personalized song recommendations
- Implemented **OAuth 2.0** authentication to securely access user data and manage playlists
- Built backend services using **Node.js (Express)** to fetch, process, and analyze audio features such as tempo, energy, and genre
- Designed an interactive **React.js + Tailwind CSS** dashboard to visualize playlist insights and enable automated playlist creation

## TECHNICAL SKILLS

**Languages:** Python, C, C++, Java, JavaScript  
**Frontend:** React.js, TailwindCSS, React Query  
**Backend:** Node.js(Express), REST APIs, Fast API, OpenAI API, OAuth2/JWT,  
**Databases:** MySQL, ChromaDB  
**DevOps / Tools:** Docker, Git, MinIO

## CERTIFICATIONS

- Generative AI Mastermind - Outskill, 2026
- AWS Cloud Practitioner Essentials training covering core cloud concepts - AWS, 2025
- DSA in C++ certification with algorithms and problem solving practice - Scaler, 2025
- MATLAB Onramp covering core MATLAB fundamentals - MathWorks, 2024
- VLSI Digital Design and Verilog certification with RTL and chip design concepts - Infosys Springboard, 2024

## LANGUAGES

**Proficient in:** English, Kannada, Hindi
